Baldwin expands the PREPAC® Advanced portfolio of pre-impregnated cleaning cloths for automatic blanket cleaning

The extended line offers unmatched cleaning results and increased productivity

Baldwin Technology Company Inc. announces the expanded PREPAC® Advanced portfolio of pre-impregnated cleaning cloths that minimize waste and increase productivity.

ST. LOUIS — June 28, 2017 — Baldwin Technology Company Inc. is pleased to announce the expansion of its PREPAC® Advanced pre-impregnated cleaning cloth portfolio. Developed for the global market to provide customized and optimized solutions, this product line meets the specific needs of various press types, applications and local requirements.

The new PREPAC® Advanced portfolio, with its unique formula of solvent and cloth, offers a superior cleaning performance. With a focus on reducing paper waste by up to 50 percent, improving cleaning results, enabling faster cleaning cycles and increasing productivity by up to 100 additional production hours per year, the upgraded portfolio provides several benefits for both the producer and the environment.

“Our new product development team has developed a breakthrough formula within the PREPAC® Advanced portfolio to meet the printing industry’s increasing demand for shorter runs, improved quality and slimmer-staffed organizations,” said Birger Hansson, Vice President of Business Development at Baldwin. “We are proud to offer customers increased productivity and efficiency, along with outstanding print results and a reduced environmental impact.”

The PREPAC® Advanced portfolio consists of various products that are customized to meet local requirements and regulations. As a leading global supplier of equipment for the printing industry, Baldwin introduced the first PREPAC® pre-impregnated cleaning cloth system in 1995, and customers worldwide now use this award-winning, highly effective and environmentally efficient product line. The expanded PREPAC® Advanced portfolio is the latest development in Baldwin’s long history of continued research and development. The company also offers dry-to-wet conversion programs for printers wanting to utilize the benefits of PREPAC® technology.
