UV Lamp head Factory Rebuilds give new life to your system

UV curing is a critical function and an under-performing system can have costly impact. Baldwin Factory Rebuild is a key for maintaining peak system performance and efficiency.

UV curing is a critical function and an under-performing system can have costly impact. Baldwin Factory rebuild is a key for maintaining peak system performance and efficiency.

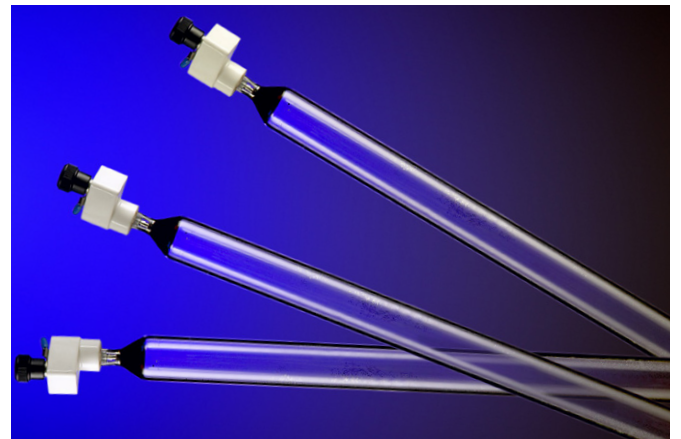

The UV rebuild process begins with a through cleaning and inspection. Worn and broken components are replaced and the lamp head is reassembled by an experienced team.

Benefits

- Maintained peak efficiency
- Minimized unplanned downtime for repairs
- Quality check on specialized UV test bench
- Multiple rebuild options to fit all budgets and equipment conditions
- No downtime, rental units available on most systems
- Optimized lamp life
- Enhanced UV output

Reflectors are then cleaned and polished or replaced if seriously damaged.

Each lamp head is put through vigorous electrical and hot water pressure testing, simulating the on press environment. *ligula cursus, nec aliquet arcu commodo.*
