

Unrivalled durability and abrasion resistance in customized cloth consumables

Designed to meet the demands of Newspaper, Commercial Web, and Sheet-fed applications, DryPac cloths are available in several strengths and resistances, as finished or converted rolls. The cloth can be specially manufactured to ensure the best-quality and cleaning results especially for your press requirements and budget.

The extra absorbency of the Baldwin DryPac allows for improved cleaning results, shorter wash times and lower cloth consumption. All cloth types are exclusively made for Baldwin and are OEM approved for universal compatibility.

Worldwide service ensures that supply and expert support are always within close reach.

Special versions of the Baldwin DryPac cloth is specifically designed for structured impression cylinders and ceramic jackets. Non-woven fabric with specially selected fibers ensures that the cloth withstands the wear caused by high abrasion applications while preventing linting and de-lamination that result in printing waste.

Advantages

Practical

- Worldwide supply and expert support
- Suitable for all press types and sizes
- Optimized for all automatic cleaning systems using dry cloth
- Unique durability and high abrasion resistance
- Fewer printing imperfections thanks to non-linting design
- High absorption capacity for best efficiency

Economical

- Low cost per wash
- Less downtime due to more yardage/meter per roll

Ecological

- Low disposal volume
- No hazardous waste (Waste-to-Energy)

DryPac

Customized Durability in Cloth Consumables

Baldwin DryPac rolls are available in several different levels of durability to suit all Newspaper, Commercial Web and Sheet-fed presses.

Whatever your requirements are Baldwin has a DryPac to suite your application. And always comes with the Baldwin high quality guarantee and product support.

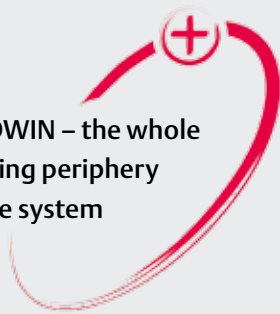

Service solutions

- Worldwide supply and support
- Cleaning optimization available through Baldwin Global Service
- Available for all automatic cleaning systems using dry cloth

Options

- Special versions for rough cylinders
- Self-winding equipment available via Baldwin
- Automatic Replacement Program (ARP) for automatic delivery based on usage

**BALDWIN – the whole
printing periphery
in one system**
