BALDWIN Vision Systems to feature technology solutions for print quality perfection at PRINTPACK INDIA 2019

Company aims to help printers automate workflows, eliminate defects, deliver perfect color

GANDHINAGAR, INDIA — January 17, 2019 — BALDWIN Vision Systems (BVS) will showcase the latest developments and new features for its growing portfolio of color management and defect detection technology at PRINTPACK INDIA 2019, held February 1-6 at the India Expo Centre in Greater Noida, NCR Delhi. BVS will exhibit in Hall 14, Stand J39.

“We are introducing some exciting new innovations, along with powerful new features to our proven technology,” says Hemant Desai, Director for BALDWIN Vision Systems – India. “**Register Guidance with MultiCam® TRIM™** is a highly economical, advanced color-to-color register and cutoff control for newspaper printers, based on the same technology as our performance-proven **MultiCam**.

“Our **Remote Ink Control** provides ink fountain automation with CIP-3 presets for enhanced print quality, make-ready and run-waste savings. **Color Control with AccuCam™** offers image-based color control along with in-line scumming detection, plate verification, and water control from the same sensor. And our powerful, proven **SpectralCam™** delivers L*a*b* data for precise, cost-effective color management.”

For Packaging & Converting, BALDWIN Vision Systems is introducing **Guardian PQV** advanced 100% defect detection for your entire production process. The new **Guardian RTM Real-Time Monitoring** uses a central server to monitor, collect, and display real-time inspection data for multiple presses and jobs—and even across multiple plants. **Autotron™ 3600** enables you to achieve complete control with the next-generation color register control solution for packaging production. **Color Measurement with DeltaCam™** helps you deliver absolute color consistency press-to-press, shift-to-shift and plant-to-plant.

“In this region alone, we currently have systems controlling color register on more than 550 newspaper and commercial presses—roughly 1600 towers/webs, and also more than 450 flexible packaging presses,” added Mr. Desai. “We are well equipped to assist our customers because of our geographical reach, our experience, and our history of serving printers in this region for last 27 years, with more than 1000 systems installed.”

The Vision Systems business unit of Baldwin Technology Company, Inc. is the world’s leading innovator of advanced color and inspection technology for the printing industry. BALDWIN Vision Systems sells its automated control systems in more than 100 countries, and maintains a worldwide network of sales and service operations. The BVS - India office is located at E-131, G.I.D.C. Electronic Estate, Sector 26, Gandhinagar, Gujarat, 382028, India. For product information, please contact Mr. Hemant Desai (+91 79 23287041, Hemant.Desai@baldwintech.com).

At PRINTPACK INDIA 2019, BALDWIN Vision Systems will be co-located with AMS Spectral UV, another business segment of Baldwin Technology Company. Specializing in LED-UV technology, AMS Spectral UV is the world’s leading manufacturer of industrial-strength curing systems.
