Baldwin launches new PureFiltration ECM Compact technology at Deburring Show 2019 in Karlsruhe, Germany

Ultrafiltration system ensuring a 100% constant electrolyte quality and flow

Baldwin's PureFiltration ECM Compact system with self-cleaning filters increases the fluids' life cycle process, minimizes chemical waste and lowers the operating costs.

This is the opportunity to experience an innovation that improves both process and product quality, saving time and valuable resources, and contributing to a sustainable future," said Roberto Garcia, Baldwin Technology's New Markets Sales.

The PureFiltration ECM is designed for high-precision ECM machining processes where a very clean electrolyte (<0.1 micron) is essential. Traditional filtration methods (filter presses) no longer meet today's high demands on surface quality and environmental aspects. The PureFiltration ECM concept is based on ultrafiltration technology, which ultimately makes the entire manufacturing process and production capacity more efficient while protecting the environment.

All Baldwin PureFiltration ECM systems are self-cleaning, fully automatic filtration systems that require no manpower and minimal maintenance. The pollution-grade cleaning cycles are short and do not require interruption of the ECM process, which significantly increases the efficiency of the process.

The PureFiltration ECM system is recommended for all industries where the overall performance of ECM processes can be improved. Baldwin offers its PureFiltration ECM in a compact size for small ECM machines as well as for high performance ECM machines as a single filtration system or centralized filtration unit for multiple ECM machines.

ST. LOUIS — September 3, 2019 — Baldwin Technology Company Inc.—a world-leading provider of technologies that improve the financial and environmental performance of production processes - is pleased to announce its presence at the Deburring Expo 2019 in Karlsruhe, October 8 – 10, (**Hall 1, Booth 418**) to present its new **PureFiltration ECM Compact**.

To meet the market demand for high quality and efficient filtration systems for smaller ECM machine applications, Baldwin has developed the new PureFiltration ECM Compact System, which ensures 100% constant clean electrolyte. Due to improved process efficiency and surface quality of the components as well as reduced electrolyte loss, the PureFiltration ECM Compact increases the production capacity sustainably.

"We look forward to showcasing our innovative PureFiltration ECM Compact at the Deburring Expo, 2019, and raising awareness of our technology to the industry. Our PureFiltration systems have proven themselves in industries such as metal and toolmaking.

This is the opportunity to experience an innovation that improves both process and product quality, saving time and valuable resources, and contributing to a sustainable future," said Roberto Garcia, Baldwin Technology's New Markets Sales.

ABOUT BALDWIN TECHNOLOGY COMPANY INC.

Baldwin Technology Company Inc. is a leading global manufacturer and supplier of innovative process-automation equipment, parts, service and consumables for the printing, packaging, textile, plastic film extrusion and corrugated industries. As a total solutions provider, Baldwin offers our customers a broad range of market-leading technologies, with a focus on improving the economic and environmental efficiency of production processes. Through a global footprint of 21 company-owned locations and an extensive network of partners, our customers are supported globally, regionally and locally by dedicated sales and service team members who add value by forming long-term relationships. Baldwin is privately owned by BW Forsyth Partners, a Barry-Wehmillers company. For more, visit baldwintech.com.

ABOUT BW FORSYTH PARTNERS

BW Forsyth Partners is the investment arm of multibillion-dollar global manufacturing and engineering consulting firm [Barry-Wehmillers](http://Barry-Wehmillers.com). Established in 2009, BW Forsyth Partners blends Barry-Wehmillers' unparalleled legacy of value creation and people-centric culture development with keen investing experience to help companies realize their true potential. With a focus limited to areas known well, BW Forsyth Partners seeks to partner with leadership teams to acquire small- to middle-market companies in the capital and component equipment, and professional services sectors. In each of our operating companies, BW Forsyth Partners deploys operational improvements and strategy development without compromising the autonomy, strategic vision and entrepreneurial spirit of their leadership teams. For more information, visit bwforsyth.com.
